Use Google Calendar to upload a new profile picture to Twitter each day. Read more about how I use this <http://wobable.com/?p=320>

Add Google Calendar entries with "ScheduleTweet" as the title, and this recipe will tweet the Description.

Simply use this recipe to schedule tweets from Google Calendar. It works especially well if you are managing a twitter account with multiple people because you can share the calendar with everyone and then no one will have overlapping tweets.

Use a specific #calendar with only birthdays. Make sure they are recurent each year. Set in the title only the name and build a message around it to post on #twitter

Use Google Calendar to schedule status updates. Put your message in the event title and stick the keyword trigger of your choice in the description.

Create calendar entries with #twitterpost in it and at that time they will be posted to twitter

1. Give the title the keywords "Twitter Status" + Short description.
2. Place tweet content in the 'Description' field.
3. Scedule tweet on date/time you want to publish the tweet.

Add a Google Calendar event with "FutureTweet" as the title, and this recipe will tweet the description

Tweets events, and their URL to Twitter. Good for marketing, perhaps, or other shenanigans of the sort.

1. Use as your title: Twitter status: keyword message. 2. Put your tweet in the event description. 3. Use the event date & time to schedule your tweet.

1. Use as title of your event: Twitter image: keyword message. 2. Upload your image somewhere and place the public link in location field. 3. Add the content of the tweet in the description field. 4. Add the date & time to your event, when you want to share your image.

This recipe notices when you have an event in your calendar title "Tweet This" and tweets the event's description. Use it to schedule your tweets.

Used by <http://azhomeownersinsurance.net>

Simply exchange "@USERNAME" with your own username to get this Recipe up and working properly.

Just put Tweet as the event name and enter your tweet in the events description.

Just create a event with title #twitter and write the tweet in description

Allows event search to tweet from multiple synced calendars in iOS

Must sync multiple calendars in iOS (see googles instructions) to designate them to your Google cal (gets around service activation which supports only 1 account)

If any event starts on the Birthdays of Current Members of Congress calendar, then post a tweet to @congressbdaybot

Anytime you add an event to your calendar you can send out a tweet to those following you. My first use for this is for posting homework assignments. When I add a homework assignment it gets tweeted (or texted) to my students who are following me. When an event on Google Calendar, with location "autotweet" (no commas), it is published on Twitter

After installing this Applet, create a Google Calendar event on the calendar that IFTTT is watching. Set the event time to be 15 minutes later than when you want the tweet to be live. (IFTTT's Google Calendar triggers happen 15 minutes before the actual event.) Put the Tweet Keyword (eg. "#tweet") either in the TITLE or the LOCATION of the Google Calendar event. Put in your actual tweet in the Google Calendar event's DESCRIPTION, keeping in mind of Twitter's character limit. Watch IFTTT work its magic and tweet for you!

Does it work?

You have to write your tweet in the description part. The keyword '#Twitter' triggers the Applet. Include it in the Title or in the 'where' box. Only the description part will be posted. My recommendation is to use the Title to define your tweet with 2-3 words so you can easily recognize it.

Photos attached to Foursquare checkins get stuck in Foursquare and are difficult to view elsewhere, especially on mobile devices. This Applet sends photos attached to Foursquare checkins to the associated Twitter account along with the Foursquare "shout" and venue name. To avoid duplicate Tweets, don't also tweet Foursquare checkins directly from the Foursquare app when you are attaching photos.

I use this Applet for tweeting when I'm at mile markers for my races. I set up Uber-Checkin (iOS <http://bit.ly/17fxtdD> or Android <http://bit.ly/17fxwWZ>) with a list of mile markers set to auto-checkin with a race-specific hashtag as the shout. In Uber-Checkin, remember to keep the app turned off (Settings -> Location Services) until you're ready to start and remember to turn it off again (or delete the shout) after you cross the finish line.

Use Uber Check-In (Android or iOS) and a list of #Foursquare mile markers (<http://4sq.com/18yYGrQ>). Add "#RnRSJ" to the shout in Uber Check-In. Result: As you pass each mile marker, Uber will check you in to Foursquare, which will trigger this recipe and tweet your progress.

Tweet any check-ins while you're in Liechtenstein.

La tenista rusa queda definitivamente fuera de los Juegos Olímpicos luego de que el TAS decidiera aplazar una decisión.

El fallo sobre la apelación de Maria Sharapova a su suspensión de dos años por dopaje, fue pospuesto hasta septiembre, lo que la deja fuera definitivamente de los Juegos Olímpicos de Río de Janeiro.

El Tribunal de Arbitraje Deportivo(TAS), informó que Sharapova y la Federación Internacional de Tenis (ITF), accedieron a aplazar la decisión, que estaba prevista para el próximo lunes.

El TAS, señaló que ambas partes querían tener más tiempo para preparar su caso. Se espera que el veredicto sea emitido el 19 de septiembre, de acuerdo con el tribunal.

Sharapova, cinco veces campeona de Grand Slam y ex número uno del mundo, dio positivo a meldonium en el Abierto de Australia en enero y recibió una suspensión de dos años de parte de la ITF. La rusa de 29 años presentó la apelación el mes pasado en busca de anular o reducir la sanción.

Se sabe que el meldonium incrementa la resistencia de los deportistas y mejora su rehabilitación después del ejercicio.

Las partes implicadas habían accedido en ese momento a un "procedimiento expedito" que habría permitido al TAS emitir un veredicto este mes. En caso que la suspensión hubiera sido anulada, Sharapova habría sido elegible para las Olimpiadas, que inician el 5 de agosto.

La decisión de aplazar el fallo hasta septiembre también descarta cualquier posibilidad de que Sharapova reciba autorización para jugar en el Abierto de Estados Unidos, que se desarrolla del 29 de agosto al 11 de septiembre.

Sharapova reconoció haber utilizado meldonium antes de cada partido del Abierto de Australia, pero argumentó que ella desconocía que el uso de ese fármaco había sido prohibido por la Agencia Mundial Antidopaje a partir del 1 de enero.

Un grupo independiente de tres miembros, nombrado por la ITF, determinó que Sharapova no tuvo la intención de hacer trampa dado que no sabía que el meldonium estaba prohibido, pero que ella era la única responsable por arrojar positivo.

Su suspensión actual terminaría el 25 de enero de 2018, lo que la dejaría fuera de ocho torneos de Grand Slam además de los Juegos Olímpicos.

5. Pinboard

Bookmark URLs and have them tweeted later when you tag them with the 'tweetme' tag.

Tag a Pinboard bookmark with (totwitter) and have it automatically tweeted

When you bookmark a link using Pinboard, include a tag such as 'tw' posts to Twitter with the title, description and URL

Figure out what tag you're going to use, then set up your Pinboard bookmarklet to

automatically fill in that tag.

On Pinboard, tags that start with periods are considered private tags; this is useful for metatags like ".twitter", where the content of the link you are crossposting have nothing to do with Twitter. Using the . in front helps keep the "twitter" tag on Pinboard full of stories *about* Twitter, rather than stories you happen to want to crosspost *to* Twitter.

Create a public bookmark on Pinboard with the tag "mustread", and you'll get a new tweet of the following form: `Must-read: "" — `.

Tag your new public bookmark (not unread) with "share-twitter" to create a tweet with your bookmark on Twitter.

Will automagically tweet every single bookmark tagged using "_share".

all design links go to twitter.

Tweet new added pinboard public bookmark

publishing a URL from pinboard tag to twitter

If new public bookmark tagged "tweet" on Pinboard, then post a tweet with description and link taken from the bookmark. NOTE: excludes bookmarks marked to read. I'm not sure why IFTTT does not allow using the to-read bookmarks. Pinboard's developer says there is no obstacles to implement this though.

#####

6. SMS

Confirm your number with ifttt first!

Avoid data charges: send a text with #tweet to ifttt, and it will tweet it for you.

As simple as an Applet can get!

Simply use "#t Your Meseage" to post tweet to twitter

eg. #pygg @bob \$5 for being awesome

Combine with AHT: Tweets to Text. Create a new IFTTT account with these two Applets for each user you want updating the Twitter account.

Si envío un sms con el hastag #tw se publica como tweet

Any SMS to 0014155783945 will post a message to twitter with the hashtag #brizzlekids

update social hiking live map by sending a sms message with specific hashtag which sends a tweet with same hashtag.

must have toodledo set to accept tweets.

Add IFTTT number (415-2879651) to your contact list.

Just send SMS having #TWEET hastag in it and it will instantly post SMS text to your Twitter ;) > Good for people without smartphone or abroad without DATA ;)

i just try it

add a task from SMS straight to your default Remember the Milk list. use time received as the due date to remind you to move it out of the inbox and file it away later. requires that you've enabled RTM's twitter service (<http://www.rememberthemilk.com/services/twitter/>), at least until IFTTT adds multiple SMS/email account support for channels.

Update Twitter by Txt. Just add #t hashtag to text message (tag not shown in tweet.)

send a text or voicemail to (657) 464-4286 and i will tweet it from @FuckardIdiot

send text or voicemail to (657) 464-4286 and @FuckardIdiot will tweet it. i promise your number wont be included

An easy way to tweet through your phone without a mobile data connection.

idk

Just in case you are in a place with no data and want to tweet, just text the ifttt phone with the #ifttt hash tag anywhere in the text and it will tweet the message.

Twitter already supports this, but this is a good workaround if you use #googlevoice and can't text to short codes.

Send an SMS tagged #tweet.

Text IFTTT with #twitter and your post to tweet

Your IFTTT number is a US based phone number. Use the US Area Code prefix: 001

Just text IFTTT #tweet followed by what you would like to post.

Use your texting device to share a tweet to twitter that posts your twitch information when you are streaming. Change bitly link to your twitch service. The message no hashtag is where you can type in your title.

Example Text ifttt the following.
#twitch DayZ Groupie Time

The result would be
DayZ Groupie Time <http://your.bitly/TwitchCHannel> @thisguy @thatgirl @thisgroup @whoami

This little dotty broadcasts a Tweet to your following that you're AOK in the event of an emergency or natural disaster and that you'll post an update soon so friends and family won't worry about you.

This works fairly well, but you can't use any hashtags unless you edit it so that it keeps the hashtags in. It automatically takes out the #tweet, but the filter takes out all hashtags.

If you text to it, it'll post a tweet! :)

to do this, send a message to your IFTTT account following the message with #tweet (No actual tags will be put on twitter.)

Sms to Twitter

If you dont have internet, you can tweet bysending a message to ifttt (#tweet + message)

Send a text message to IFTTT which tweets message for you.

Text #tweet and Post Update to Twitter with no hash tag visible

Post A Tweet by texting #tweet to the number that you already receive Twitter Notifications through your phone! Never waste time by opening the Twitter Application again! It's faster and more productive!

توویت کردن با یم اس ام اس

tweet by sending SMS

n/a

To set up: Add the IFTTT SMS number to your iPhone address book, add that entry to "Friends" on your Apple Watch app, and set the Messages app preference inside the Apple Watch app to "Audio Messages: Always Dictation."

To execute: Press the side button on the Apple Watch, select IFTTT from friends, press the text bubble icon, press the microphone icon, speak into the watch, view the text and press "Send."

This may sound like a lot of commands, but it's very intuitive and takes just a few seconds.

Send a text with #tweet to IFTTT to create a tweet

You can post a tweet just by sending a sms text by adding the tag #tweet .

system to gain knowledge

#####

7. Phone Call (US only)

Simple: call and leave a message, that message gets posted as a tweet, along with a link to the original recording.
Perfect for tweeting while driving.

Leave ifttt voicemail and it will post the Text of it along with an Mp3 to your Twitter stream

Leave your tweet as voicemail to IFTTT phone number (415-938-6993)

Leave a VM for IFTTT and your Twitter stream will be updated with VM audio.

Call (415) 938 6993 wait for the beep, and say your tweets! For the man (or lady) too busy to text and also they don't have hands...

Leave a voicemail, and ifttt will send a Twitter DM to Remember the Milk. You must first set this up at rmilk.com/services/twitter/

Leave an audio message for your followers

Have to set up the Toodledo preferences to accept Twitter DM (D toodledo)

Now we can call IFTT.COM and leave a message to our Twitter #Followers ! Awesome!

Leave a voicemail, and IFTTT turns it into a tweet

If you leave (415)-769-3612 a voicemail from your phone number + areacode, then it will post a tweet of your recorded voicemail.

Share this well + hard!

Hugz,

Icey Hawt

#####

8. Gmail

Change my twitter handle to yours.

Label your e-mail notifications on RT from Twitter in Gmail, THEN, post a tweet including note Thank you for RT and {{Subject}} (which include "@username"). One personal picture can be added in the end!

Requires an account in Remember the Milk and a Twitter account, and you'll need to add rtm as a friend in Twitter (see here: <https://www.rememberthemilk.com/services/twitter/>). This automatically turns purchase confirmations for Groupon into tasks in Remember the Milk. (I have it assign a "groupon" tag in rtm, too.)

Will need to create a filter to label desired emails as "twitterpost" then any mail received that gets labeled twitterpost will tweet.

Google Calendar to Twitter via Gmail

Label all your incoming email from twitter with say, 'twitter' and then DM yourself with the subject line. You'll find out when people favourite your tweets or follow you depending on how your email notifications are set up in twitter.

Adds Remember the Milk reminder to return Redbox movie the next day when you receive an email from Redbox.

d {{BodyPlain}} Ne pominji mi tugu rasplakaću se! Od tuge možeš da zarđaš, ne budi tu žan! <3

Create a contact on your 4s called something like D (contact name) and make their email address (you gmail username)+D(their twitter username)@gmail.com. Next in gmail, set a filter to label any mail to the above address with D(their twitter username). Now in set the

trigger to the above label and the action to D (their twitter username) {{subject}}.
You can change the D to @ to reply to them instead.

通过 139 邮箱短信发推

Adds emails labeled as "Follow up" to the following day in Remember the milk (using Twitter)

Plug-in notification 1 of 2

Reminder tweet because your car is unplugged and its getting late.
Make sure you have notifications. Follow +Noble Ackerson instructions.

Make sure to have your notifications enabled. Also note the label. This is 1 of 2, there is also another Applet to call you.

Notifies you if your charge is interrupted. This is 1 of 2 see the second part of this which calls to warn you of the interruption.

Some one email you, send a tweet

Use Twitter in the Subject Line of e-mails to your Gmail account to update your Twitter feed when you have your Social Media sites restricted

If you set up label to filter google calendar reminders, then when an email is placed into the folder for that label, a tweet will be sent with the reminder information.

This is the second half of an Applet that allows the user to retweet a direct message from a particular user.

Shout to your followers every time you receive a spam.

Tweet MavAlert Emergencies that you get by email

Fast and easy way to let your followers know that there is a problem with your site, but you are doing your best to get it back online. Just replace www.example.com with the target label of your site and you are good to go. Users of www.websitepulse.com can now do some proactive reputation management of their own :)!

Simple way for www.websitepulse.com users to let their followers know when a problem has been resolved. Replace www.example.com with your own target label and you are set.

Can be used to repost free cycle posts to twitter. Use a label more appropriate to your freecycle list

Change gmail label and link in tweet

The subject of the notification email will be what is in your tweet.

I created a new gmail and twitter account. This will post any calendar notification email that you get, so I suggest separating your personal gmail and this one.

1. add "TweetPost" contact with youremail+twitter@gmail.com
 2. add filter that labels TO: youremail+twitter@ as TweetPost, FROM you
 3. Siri: "send email to tweet" with garbage for body. Only subject gets tweeted.
-

Send a Tweet by email

Create a filter in Gmail so when you get an e-mail about a new follower on twitter, you automatically send a tweet thanking (and tagging) the new follower.

Your Gmail filter will be a search for "is now following you on Twitter!" in the subject line. This filter is to apply the Label 'TwitterFollow'. Then IFTTT tweets "Thank you for the Follow! (Person Name (@twitterhandle) is now following you on Twitter!)". It's dirty and not very customizable/personalized, but it gets the job done.

Con este Trigger le darás las gracias a cada nuevo seguidor que recibas. Hay que crear un filtro en Gmail para que etiquete el correo que te indica que tienes un nuevo seguidor con la etiqueta "Seguidores" o la que decidas.

When the email comes in from the 3rd party review site, Tweet it with a link for people to see (great for the competition that follow you!)

Create a filter in Gmail so when you get an e-mail about a new follower on twitter, you automatically send a tweet thanking (and tagging) the new follower and letting them know via url to this recipe as to how you did it!. Your Gmail filter will be a search for "is now following you on Twitter!" in the subject line. This filter is to apply the Label 'TwitterFollow'.

Then IFTTT tweets "Thank you for the Follow! (Person Name (@twitterhandle) is now following you on Twitter!) via @IFTTT #recipe65060 <https://ifttt.com/Applets/65060>".

Label your e-mail notifications on Follow from Twitter in Gmail, THEN, post a tweet including note Thank you for following and {{Subject}} (which include "@username"). One personal picture can be added in the end!

Houston, we have a sighting. Your gmail must be signed up to receive alerts at <http://spotthestation.nasa.gov/>.

If you receive a mail with #troll in the subject, then the body will be tweeted!

Twitts the body plain of an email that somebody sent you with the subject "#troll"

Sushi Counter specialises in the creation of sushi, sashimi and other Japanese specialties rolls. Prepared fresh with care in our boutiques by our own staff of sushi chefs, our products offer great flavours, consistent freshness, positive health benefits and an authentic food experience.

You need to register first at <http://spotthestation.nasa.gov/> to receive the e-mails!

Primero hay que crear una etiqueta en GMail, por ejemplo: "Retweet" (sin comillas). Crea un filtro que busque correos con el asunto "ha retwitteado uno de tus Tweets!" (sin comillas). Indica que se aplique la etiqueta "Retweet" a los correos que cumplen con ese criterio. Ejecuta el filtro para asegurar que se apliquen las etiquetas. ¡Listo! Ahora personaliza los campos de la receta, aquí abajo.

Email to Twitter

1. Change the subject line search to your paper title 2. Customize your tweet and link to your Paper.li URL

Create a search in gmail that labels your twitter "followed you" emails.

Checks email subject line for 'is now following you on Twitter' then tweets a thank you response and tags the subject line onto the tweet. Because the subject includes @twitterusername they will be notified that you mentioned them in a tweet. This is a variation of the recipe which uses Gmail labels but I couldn't get that one to work for me hence this work around.

This recipe allows you to post reminders to your Google Calendar events to your Twitter account.

In order to use this properly, you must first specify the time interval you'd like for Google to e-mail you the reminder for your event (e.g. an hour before, 1 day before, etc.)

In the "Search For" field of the Gmail trigger, substitute your actual Calendar Name in the 'subject:(Calendar Name)' search operator.

This is a complicated way of getting sms alerts from the website uptime site StatusCake. It requires two twitter accounts that tweet to one another on receipt of an email. One of the accounts can then send an SMS to a mobile linked to that account.

To use: Email yourself with the subject "tweet". One time setup: In the trigger below, edit REPLACEME@gmail.com to be your address.

It's a bit ridiculous but it works without registering as an app with Twitter and can handle more than 20 at a time. The google spreadsheet template is here: <http://goo.gl/QkKtW>. Just go to script editor and set the scheduler to check every 30 minutes or so.

If somebody RT you, you can say thank you!

This recipe creates a tweet of the subject line of notification email (in Blogger this lists the title of the blog and the title of the post that received a comment). The Twitter feed has to be public but it will not link to your blog.

If you choose to add the Body of the email you will get the truncated comment itself, but that will be made public too.

My school blocks Twitter, yet sometimes I need to tweet something funny my teacher just said. That's where gmail and IFTTT comes in handy! Once you use this Applet, you have to create a gmail filter that add's the 'Twitter Post' label.

1. Your GMail label can be something like "is now following you on Twitter". 2. You have to first turn on Twitter email notification of new followers. You do this in your Settings tab. 3. You also have to go into your GMail settings and create a filter that automatically places emails from Twitter into a certain label. 4. Then you will create the label in GMAIL. 5. Create a filter in Gmail so when you get an e-mail about a new follower on twitter, you automatically send a tweet thanking (and tagging) the new follower. Your Gmail filter will be a search for "is now following you on Twitter!" in the subject line. This filter is to apply the Label 'TwitterFollow'. Then IFTTT tweets "Thank you for the Follow! (Person Name (@twitterhandle) is now following you on Twitter!)". It's dirty and not very customizable/personalized, but it gets the job done.

9. Dropbox

I tweet images without even stepping into Twitter! First, I title an image with a funny/catchy/clever title (the tweet). Second, I add said photo to my /Public/Twitter folder on Dropbox. Voilà!

When you make a picture with Android, it automatically goes to the Dropbox using Dropsync app. And then sent to the Tweeter

When I'm on the move uploading to things like TwitPic can take time and needs a data connection I haven't got. This recipe lets me drop my photos into a folder and, after uploading whenever I have a connection, tweets automatically when they're ready.

Copy image to Public Dropbox folder

Helpful if you wanna share your dropbox public files via your twitter account.

Tweet's images that are saved to dropbox folder to use as background image and screen saver (on PC use <http://johnsadventures.com/software/backgroundswitcher/>)

Shout out a Dropbox share via Twitter.

This Applet will automatically tweet your latest screenshot (mad with shutter e.g.)

Using an folder action applescript, an alias is created of any new TV show or movie file that I download and placed into a folder on dropbox.

Create a folder in your public directory on dropbox called "avatar". Put a picture in that folder and it will be added as your twitter profile picture.

When a new fotodanz is uploaded to a public folder in Dropbox (/fotodanz), tweet it automatically.

Take a photo place it in Dropbox and then tweet it with my hashtag

Save digital drawings to your Dropbox, then off they go to Twitter!

Create a folder named "Avatars" in Public folder inside Dropbox, drop in a photo and have it show up on Twitter's profile picture in a few minutes. Less work for you :)

You can change the subfolder's name below!
(Don't delete the "/")
And the folder it makes is under the Public folder.

I wanted a way to intermittently tweet interesting/funny pictures that I had stored in my dropbox. I wrote a vbs script that moves a picture from my repository to the upload folder

this Applet uses - every 4 hours. It will use the file name as the tweet.

Here is the VBS - you can modify the folder structure to have it move from your repository or alter the wscript.sleep.

```
Dim fs, f, f1, fc, s
output = "C:\Users\Tye\Desktop\Dropbox\Public\ToPost\"
Set fs = CreateObject("Scripting.FileSystemObject")

Do while true
thehour = datepart("h", time)
if thehour > 6 and thehour < 24 then
if fs.getFolder("C:\Users\Tye\Desktop\Dropbox\Upload\ToPost").Files.Count > 2 then
    Set f = fs.GetFolder("C:\Users\Tye\Desktop\Dropbox\Upload\ToPost")
    Randomize
    i = CInt((Rnd() * f.Files.Count))
    j = 1
    For Each fi In f.Files
        If j >= i Then
            'MsgBox(fi.Name)
            fs.MoveFile "C:\Users\Tye\Desktop\Dropbox\Upload\ToPost\" & fi.name,
output & fi.name
            Exit For
        End If
        j = j + 1
    Next
end if
end if
Wscript.Sleep 14400000
loop
```

Well it will Post The Screenshot that was uploaded automatically on Twitter.

We all know that using image upload services like twitpic and other produce low resolution images on Twitter. Only direct upload on Twitter server is the solution. This service exactly solve that problem. You upload image in dropbox folder with appropriate description and that's all. IFTTT server will upload that image from dropbox and use your description of the image as Twitter text.

Post a tweet if you upload a file to your public folder. Please follow @jamie_bishop__

dropbox from booth

;)

Used to "live post" to Twitter during presentations.

The process:

1. Set your dropbox to be the repository for screenshots:
<https://www.dropbox.com/en/help/1964>
2. Set your computer display option to "Mirror Displays".
3. when you're on a slide you want to share, make a screenshot using the fullscreen keyboard shortcut (on mac, this is Shift+Command+3).
4. TURN THIS RECIPE OFF WHEN YOU'RE DONE WITH YOUR PRESENTATION.

The drawback here is that IFTTT runs on a 15 minute check...so the images won't be immediate,

but will batch send each 15 minutes. I don't think there's a way to change this.

Share twitter message and first picture in document.

12. Blogger

Every time you post something in your blog, you also tweet it.

si digicom en blogger, #digicom en twitter

To automate tweets of new Blog posts link the Blogger account and also the Twitter account.

Do you know the answer ?

Start each blog post with a "Twitter Version" sentence and this sends out the title, twitter version (in the content) and the URL

Check it !

Si haces un nuevo post en tu blog, compartes su URL en Twitter

The Best Ten Tips For Successful Dieting
By Emma Davies

It is common knowledge that regular exercise and eating lower amounts of food is vital to weight loss but some people still find it difficult to do. The right diet should not be difficult for you to maintain. Here are the best ten tips that will enable you to develop the right attitude for reducing your weight.

Information is Key

Keep up to date with the latest research, read articles in magazines and find out about healthy eating. With the latest information you will be able keep on course giving you that self assured feeling to achieve your weight loss goals.

Blogger > Twitter

This'll post a tweet on your Twitter each time you blog with the content, "#sasect", title, and link of your blog post.

I setup a Blogger with email posting for the #TLC2014. Then, I created an IFTTT Applet to share the posts as they come in on Twitter. If you'd like to share the posts everyone is writing, or modify to get just TeamJXN tagged posts, with your followers, use this Applet!

Best Body Tips in Twitter

Le Teen Café is a life and entertainment blog written for teens, by teens. We feature everything from life tips to style and beauty advice to our opinions on the newest and hottest celebrity headlines. Occasionally, we might even give sneak peeks into our own lives to talk about events that would connect with you lovely readers.

We try our best to make sure our voices seep through our blog posts so you won't be reading bland words written on the screen, but words that make you feel as though you're having a conversation with your best friends in a café. Because, well, you know, no one goes out to have a good time anymore. Or is that just me?

Each of our writers, or baristas, has a distinctive voice and we hope our opinions, voices, and personalities will keep you coming for more posts every day. We update often so be sure to keep checking out leteencafe.blogspot.com because you're all awesome like that.

From time to time, we may even host contests, so keep your eyes peeled for them. In the meantime, browse the blog, read some posts, and take a sip out of your coffee.

So, down to business. May I take your order?

Blog automatically shared to twitter with image.

This is a simple IFTTT recipe that shares new Blogger / Blogspot posts to Twitter.

Auto-update your twitter account when you post something new to your blog.

For blogger

I always have difficulty remembering to post my blogger posts to my twitter because it doesn't automatically do it for you like it does for your google profile. So that I never miss a prime opportunity for sharing my stuff, this will do it for me.

Make sure you place labels in your Blogger Post before publishing to receive proper #hashtags

I've created a blog to record my thoughts on working in the media industry and to cite interesting articles on the subject; however, because my blog (like so many others) gets little traction, I wanted to increase its visibility by leveraging my twitter account, which is slightly more visible (in terms of followers and the nature of the platform). Accordingly, this recipe seeks to achieve this goal by requiring that if a new post is made on the blog, it automatically posts to my twitter account with relevant hashtags (e.g., #Entertainment #Media), which also increase visibility, to my twitter account.

Punca masalah jerawat memang sentiasa dikaitkan dengan pelbagai elemen dan salah satu daripadanya ialah hormon yang dihasilkan oleh tubuh penghidap masalah jerawat itu sendiri.

Walaupun jerawat bukanlah sejenis penyakit yang boleh membahayakan nyawa, tetapi untuk perkongsian kali ini, saya akan menerangkan kepada anda bagaimana hormon boleh menyebabkan berlakunya masalah jerawat ke atas anda.

Pertumbuhan jerawat pada kulit terutamanya di muka boleh menyebabkan penghidap menjadi kurang berkeyakinan dengan penampilan dirinya sendiri.

El periódico alemán Der Spiegel ha publicado un artículo que ha hecho tambalear los cimientos de la psiquiatría infantil ya que ha revelado que el psiquiatra Leon Eisenberg, quien puso nombre al TDAH y probó fármacos en alumnos difíciles, afirmó unos meses antes de morir, cuando contaba con 87 años que 'el TDAH es un ejemplo de enfermedad ficticia'. ¿Acaso no se os ponen los pelos de punta al pensar en esta afirmación después de años medicando a niños hiperactivos?

The Rivers State chapter of All Progressives Congress, APC, has condemned the directive by the governor of Rivers State, Chief Nyesom Wike to PDP members to resist illegal arrests

before and during the forthcoming rerun elections in the State as it also tells him not to take others along on his suicide mission. The APC in a statement signed by the State Publicity Secretary, Senibo Chris Finebone, advised Rivers people to discontinued such inciting directive by the governor as it is capable of pitching law enforcement agents against innocent citizens of Rivers State. "The APC wishes to advise Rivers people irrespective of political affiliations to act within the law before, during and after the March 19 re-run elections in Rivers State. This appeal has become necessary at this time with the backdrop of the highly troubling, inciting and unlawful directive by Gov. Nyesom Wike to PDP members to resist unlawful arrest by security agents," the statement said. According to the APC Spokesman, the APC believe that the directive by the governor to his party members was mischievous, dishonest and dangerous. He said: "Indeed, it raises several questions. Did Gov. Nyesom Wike properly explain to his party members how to differentiate between legal and illegal arrests? As a lawyer, does the governor know that reasonable and lawful response to arrest [whether legal or illegal] is not to resist it which is in itself unlawful? Did Gov. Wike explain to his supporters the different dimensions and scenarios that resistance to arrest can result to?" "The APC continues to be concerned at the desperation of Gov. Nyesom Wike for political power even when his methods portend danger to lives and property of the innocent and hapless. As a political party, the interest of the APC remains the safety and wellbeing of the citizenry irrespective of party affiliations. We believe that a state governor should sometimes drop the partisan toga and assume the more honourable task of safeguarding the lives and property of the generality of the people. Chief Nyesom Wike should now realise that the killing and maiming of innocent Rivers people, whether members of PDP or APC, must stop immediately. Even as the leader of the PDP in Rivers State, he has no right to put the lives of PDP members in harm's way through manipulations and grandstanding. It is enough that he has vowed to gatecrash into INEC and no 'Boko Haram' Army will stop him on election day; the APC wishes him well. But he must not take others along on his suicide mission. "Quite frankly, the APC notes that the governor now acting like a bull in a china shop must realise that many have acted and even exceeded him in lawlessness, recklessness and false bravado in the past but history has its sad tales of them. If the governor is in doubt, when next he attends a burial at the cemetery, he should take a closer look at the writings on the tombstones. But like they say, 'you may borrow trouble but do not lend it to your neighbour,'" the statement said. The APC Spokesman called on well meaning Rivers people to stay out of harm's way during the forthcoming elections by rising above the mediocre style of Gov. Nyesom Wike which bothers on obscene desperation reminiscent of someone on a suicide mission. In another development, the Rivers State chapter of All Progressives Congress, APC, has advised Oraye Franklyn, Chief Nyesom Wike's Senior Special Assistant on Social Media to be useful and desists from misinforming Rivers State people. The APC in a statement made available to NF-Reports by its Spokesman Senibo Finebone said, "For very good reasons, the All Progressives Congress, APC, Rivers State chapter would have ignored the vitriolic attack targeted at our great party by Oraye Franklyn, Chief Nyesom Wike's Senior Special Assistant on Social Media. We know that a response obviously would dignify Franklyn's unfounded comments but as a progressive party that is conscious of truth, we need to state the facts to avoid misleading the people." The party stated unambiguously that the APC has never and will never play politics with the lives of Rivers people, adding that to do anything of such would not only be immoral

but sinful before God Almighty. The statement further reads: "We are concerned about the safety of our people and that is why we have been speaking on the ugly developments in our state. "As a party, we have remained at the receiving end of the violence and deaths that have enveloped Rivers State for over six years now. All we ask is for peace and security to reign because we know the consequences of anarchy. Our people have suffered enough. "APC members across the state have been attacked and killed, sometimes in the presence of their families. More APC members have died over these unfortunate years and this is a fact that is well known around the state. And for these long years of strife, we have been speaking and calling the world's attention to the daily attacks and killings taking place in our state. "So we were shocked that a Special Assistant who lives and works in Rivers State will be so dishonest, uncharitable and bold in accusing APC of politicising insecurity. "The question is: how can a party that has suffered more from insecurity, at the same time politicise the very malaise that gives it endless nightmare? As at today, insecurity pervades the entire length and breadth of all Local Government Areas of Rivers State. In fact, there is no local government where we have not had one form of killing or the other. Unfortunately, all the violence and death are traceable to the governor's acolytes. "I think all of us, irrespective of our different political affiliations, must be very concerned about a quick resolution to this crisis. We cannot achieve peace by deliberately writing and circulating falsehood just to score a cheap political goal. A Special Assistant will be more useful to the state when he desists from misinforming the very people he is paid to serve."

Much like other to-do list hacks, this posts items from your to-do list to Twitter as you add them.

Triggers every time you strike off a To Do on Alexa. Does not share the contents of the To Do List.

This recipe uses twitter direct messages to pass information to RTM. Since they are direct messages, this will not show up on your twitter timeline, and will only be visible to you. Complete the Remember The Milk twitter setup here: www.rememberthemilk.com/services/twitter/ to have this functionality.

To add a new item to RTM from Echo use the new item create recipe posted here: <https://ifttt.com/recipes/286050-when-i-add-an-item-on-my-amazon-echo-to-do-list-add-the-same-item-to-remember-the-milk>

Adding an item to the Echo shopping list automatically copies it to your Remember The Milk shopping list. Uses the RTM direct tweet interface; see <https://www.rememberthemilk.com/services/twitter/>

This Applet tweets when you ask Alexa to play a song.

Add an item to your to-do list and have that item tweeted for the world to see.

Tweets every time you play a new song

Requires Remember The Milk be setup with @RTM interface see <https://www.rememberthemilk.com/services/twitter/>
Note adds as priority 1, due today to get to top of list for easy sorting.

Say "Alexa, trigger emergency" to tweet an SOS (FWIW)

Use* in conjunction with:

Add tweet when alexa adds todo

everytime you play a song on your Amazon Echo or using Alexa, then an automatic tweet
is posted with the name of the song. Great for remembering what the music you were
listening to.

Have Alexa ask twitter for weekend plans
